## A bit about us in a nutshell

---

Back in 1990 I Giuseppe MARTELLI a 14 year old high school student created a small business in Southern Italy producing Mushrooms, vegetables and a few nursery plants.

After four years and a small success in business the decision to enrol at the Agricultural faculty in Bari/Italy was made and a few years later a job opportunity arose as a lab technician at the university working in Micro-propagation and tissue culture of which I was accepted for the position.

During this time I worked tirelessly to expand my business while still working at the lab and finishing my studies.

Investing majority of the income from the job at the lab and uncountable amount of hours, the Nursery side of the business started to grow at a very fast rate.

What started as a small High school boy project turned into a comprehensive business employing in excess of 50 workers between permanent and seasonal and producing a staggering 500.000 plus trees a year.

## New beginnings

Back in the year 2000 I arrived in Gisborne NZ where I met my current wife Janine and together we began the Taruheru Nursery legacy.

After 24 years together and four children later, Taruheru Nursery is still operating with over 30 years of experience and a lot of happy customers.

Now days Taruheru Nursery is ZESPRI and KVH accredited for the production of licenced Kiwifruit vines like gold and red, we are members of the NZ avocado nursery association and hold the exclusive rights of propagation for the 2PH SEEDLESS EUREKA LEMON Cultivar.

## Our Trees

Taruheru Nursery collaborate with Plant and food research, NZ fruit Trees Company and most of the growers in NZ.

We specialize in Citrus production and produce in excess of 100.000 grafted plants a year.

All of our trees are containerized and grown inside climate controlled Hothouses.

Our rootstocks are fully grown from imported certified seeds sourced from accredited overseas germplasm facilities.

Most of our bud-wood is sourced from establish high productive orchards in the Gisborne and Hawkes Bay region and from our own mother plant block although we often use client selected bud-wood to accommodate our customers specific needs and requirements.

**We can offer a range of different rootstocks to suit all requirements including but not limited to**

**C35 / TRIFOLIATA / SOUR ORANGE  
BENTON CITRANGE / COX MANDARIN HYBRID**
